

PUBLIC NOTICE

COMMENCEMENT OF WORKS

THE ESTABLISHMENT OF A FISHING FACILITY AND ITS ASSOCIATED INFRASTRUCTURE AND APPURTENANCES AT GRAN CHEMIN, MORUGA

ABOUT THE PROJECT

The Government of the Republic of Trinidad and Tobago (GoRTT), is desirous of developing a modern fishing facility at Gran Chemin, Moruga.

The National Infrastructure Development Company Ltd (NIDCO) has been selected by the Ministry of Works and Transport as the executing agency to provide Project Management Services for the design and construction of this facility. K Jameson and Associates Ltd. was engaged by NIDCO to provide the required Design Consultancy Services for this initiative.

ACTIVITIES ON THE PROJECT SITE

In July 2020, the contract to provide the construction services for this project is scheduled to be awarded to the successful bidder.

As part of the works, the Contractor shall be engaged in activities such as clearing, cutting and filling, piling, drainage works, installation of services infrastructure, and building construction. The scheduling of such activities that may impact nearby receptors will be provided by the Contractor.

PROJECT SCHEDULE

Proposed Start Date of Construction: 3rd August 2020 | Duration: Fourteen (14) months

CEC REQUIREMENTS

The proposed activities for this project (Ref No. CEC55548/2018) are as follows:

- Activity 8 (a) - Clearing, excavation, grading and land filling
- Activity 9 - Waterproofing/ caulking/ paving
- Activity 13 (b) & (c)- Coastal or offshore construction or modification and dredging activities
- Activity 29 – Establishment of infrastructure for the storage of petroleum or liquid petroleum gas or their derivatives
- Activity 34 – Establishment of infrastructure for marine transportation
- Activity 41 (a) – Establishment of land drainage and irrigation schemes
- Activity 42 – Establishment of waste water or sewage treatment facilities
- Activity 43 (a) & (c) – Provision of other service-oriented activities

MITIGATION OF POTENTIAL NEGATIVE IMPACTS

- The anticipated adverse impacts associated with the activities listed above include fugitive dust, noise and vibrations, diesel fumes, soil erosion and runoff, and accident risk related to heavy equipment.
- All factors that may pollute the environment or create a nuisance will be considered by the Contractor; and the following mitigation measures will be put in place to avert or manage them:
- Cleared areas and stockpiled materials will be maintained in a dampened condition to prevent dust generation.
- There will be a designated area for washing of concrete trucks which will be impervious and bunded.
- Heavy equipment and vehicles will be regularly inspected and maintained.
- Construction safety signage will be erected.
- Use of heavy equipment will be scheduled for during the day, as practicable.
- Temporary hoarding will be placed along the boundaries of the site.
- Sediment retention measures will be implemented to prevent sediment migration offsite.

Please note that no unauthorised person(s) will be allowed to enter the construction site.
